

DATA ANALYSIS

BANKING CUSTOMER REPORT

April 2025

Hoang Thai Huy

OVERVIEW: THE BIG PICTURE

113.07K

Total Customers

104.16K

Total Customer Using Service

7403.70bn

Total Amount

67.95K

Median

65.48M

Average

132.50bn

Max Amount

- The branch currently serves over **113K customers**, with more than **104K actively using banking services (90% of customers)**, indicating strong customer engagement.

- Total deposits reached approximately **7,403.7bn VND**. However, customer balances are highly concentrated, as **the average balance (65.48M VND)** is significantly higher than **the median balance (67.95K VND)**. This suggests that a small group of high-value customers contributes most of the branch's deposits and revenue.

→ **"Many customers, but little revenue"** — the real value lies within a very small group.

CUSTOMER SEGMENTATION

- **Regular customers** account for nearly **80% of the customer base**, but most maintain **very low balances (< 60k)**, indicating a **large but low-value customer segment** with limited revenue contribution.
- **Gold customers** contribute most deposits despite representing only a small customer segment (**3% of gold class → 80% of total amount**). This indicates high dependency on **premium customers**.
- Credit card services show the strongest adoption across all regions, **especially in Ho Chi Minh City**, suggesting **strong potential for future revenue growth**.

Count of customer_id by segment

Sum of amount by segment

Sum of amount by province_city

→ **3% of customers are driving most of the bank's financial value**

REGIONAL CUSTOMER BEHAVIOR: TWO IMPORTANT BUT DIFFERENT MARKETS

Ho Chi Minh City — “High Value Market”

- Total deposits are approximately **4x higher** than Hanoi
- Higher proportion of Gold & Silver customers
- Average customer balance is approximately 4x higher

→ SG represents a **high-income** and **high-profitability** market, with **stronger premium** banking adoption and **higher customer value concentration**.

Total			4,469,897,354,536.63

Hanoi — “Mass & Conservative Market”

- Regular customers account for the majority
- Average balances are significantly lower
- However, balance maintenance rate is 10% higher than SG

→ HN represents a stable but **lower-value** market, with more **conservative financial behavior** and **lower premium** banking penetration.

REGIONAL FINANCIAL BEHAVIOR & REVENUE DRIVERS

Ho Chi Minh City (High-Value Market)

- Highest credit card adoption (**10,658**)
 - Strong deposit activity
 - Lower mortgage usage
- Customers in SG demonstrate consumption-oriented and **flexible financial behavior**, with stronger engagement in transaction-based banking services.

→ SG represents the **strongest market for scalable revenue growth through credit cards, digital banking, and premium financial products.**

Hanoi (Conservative Market)

- Higher mortgage adoption
 - Lower credit card usage
 - Lower deposit activity
- HN customers prioritize **long-term financial stability** and **asset ownership** over short-term credit consumption.

→ **Mortgage and long-term savings** products are more **suitable growth strategies** for the Hanoi market.

SG and HN represent two fundamentally different financial markets, requiring region-specific growth strategies

REGIONAL FINANCIAL BEHAVIOR & REVENUE DRIVERS

Other Regions (Untapped Market)

- Strong **savings deposit** activity
 - **Lower adoption** of credit cards and loan services
 - **Limited** engagement in **premium banking products**
- Customers in other regions demonstrate savings capability but remain weakly connected to the broader financial ecosystem, with lower participation in borrowing and transaction-based services.

➔ Other regions represent an untapped growth market with strong potential for digital banking adoption, customer engagement, and premium service expansion.

KEY BUSINESS INSIGHTS

Insight 1 — Heavy Dependency on Premium Customers

The bank relies heavily on a very small premium customer segment, where only **3% of customers contribute nearly 80% of total deposits.**

Insight 2 — Large Customer Base but Low Monetization

Most customers remain low-value and contribute limited financial impact despite representing the majority of the customer base.

Insight 3 — SG and HN Represent Two Different Markets

Customer financial behavior differs significantly across regions:

- SG customers prefer flexible spending and transaction-based services.
- HN customers prioritize long-term financial stability and asset ownership.

Insight 4 — Product Usage Reflects Financial Mindset

- SG → consumption-oriented and leverage-driven
- HN → conservative and savings-oriented

STRATEGIC RECOMMENDATIONS

1. Retain Gold Customers (Top Priority)

- Loyalty programs
- Dedicated relationship managers
- Personalized financial offers
- Wealth management services

2. Convert Regular → Silver Customers

- Balance retention incentives
- Cashback and tiered rewards
- Gamification campaigns
- Cross-selling financial products

3. Implement Regional-Based Strategies SG

Focus on:

- Credit cards
- Premium banking
- Investment products

HN

Focus on:

- Savings & fixed deposits
- Mortgage bundles
- Long-term financial products

4. Reactivate Inactive Customers

- Re-engagement campaigns
- Welcome-back incentives
- Trigger-based customer messaging

“The bank does not lack customers — it lacks high-value customers. Future growth depends on customer monetization, premium customer retention, and scalable financial services rather than customer acquisition alone.”
